

Brainstorming & Idea Prioritization Template

Date	2 July 2025
Team ID	XXXXXX
Project Name	Rising Waters
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Kummari Karthik	Collect historical flood data, identify key parameters, and prepare the project workflow.	Data Collection & Planning	1
2	Manasani Brundavani (Team Lead)	Define the flood prediction problem, gather requirements, and conduct a literature survey.	Problem Analysis	1
3	P Giri Venkata Reddy	Perform exploratory data analysis (EDA) to identify patterns and important flood-related features.	Data Analysis	2

4	Chakali Ravi Kumar	Clean and preprocess the dataset, train machine learning models, and evaluate prediction accuracy.	Data Preprocessing & Model Building	2
5	Sai Pragna Pragna	Develop the Flask web application, integrate the trained model, and deploy the prediction system	Web Development	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Problem Definition, Requirements, Dataset Collection, and Project Planning	High	High	1	Yes
2	Flask-Based Web Application for Real-Time Flood Prediction and Risk Visualization	High	High	2	Yes

3	Data Analysis, Data Preprocessing, and Machine Learning Model Development for Flood Prediction	High	High	3	Yes
---	--	------	------	---	-----
