Empathy Map

Created an empathy map to understand the needs and challenges of people in flood-prone areas. This helps develop a user-friendly flood prediction system that provides accurate predictions and timely warnings.

SAYS	THINKS
- I want to know if my area is at risk of flooding. - I need accurate flood predictions before heavy rainfall. - I want to protect my family, home, and property from flood damage.	- Will my area experience flooding today or in the coming days? - How severe will the flood be? - Can I trust the prediction to make timely decisions?

**PERSONA
NAME**
farmer

DOES

- Worried about the safety of my family.
- Anxious during heavy rainfall and rising river levels.
- Hopeful that early warnings can reduce losses.

FEELS

- Monitors weather and flood alerts.
- Checks river water levels and rainfall updates.
- Takes precautionary measures such as moving valuables and preparing for evacuation
