Project Name	Rising-Waters-Flood-Prediction
Maximum Marks	2 Marks

Customer Journey Map: The Customer Journey Map illustrates the experience of a user living in a flood-prone area while using the Rising Waters – AI Flood Prediction System. It captures each stage of the user's interaction, from recognizing the need for flood information to receiving predictions and safety recommendations. Understanding this journey helps identify user needs, pain points, and opportunities to improve the overall experience by providing timely, accurate, and easy-to-understand flood risk predictions.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	•Monitors weather forecasts •Checks rainfall updates •Opens Rising Waters application	•Enters location •Views flood prediction •Reads safety recommendations	•Follows emergency instructions •Shares alerts with family •Moves to a safe location
Touchpoint <i>What part of the service do they interact with?</i>	•Mobile App •Weather Dashboard •Weather Alerts	•Prediction Screen •AI Prediction Module •Alert Notification	•Emergency Alert Screen •Safety Guidelines •Government Emergency Services

Customer Thought <i>What is the customer thinking?</i>	•Is there a chance of flooding? •Should I prepare early? •Is this information reliable?	•Will my area be affected? •Should I evacuate? •How serious is the flood risk?	•My family should stay safe. •I need to act quickly. •The warning helped me prepare.
Customer Feeling <i>What is the customer feeling?</i>	•Curious •Concerned •Alert	•Anxious •Focused •Hopeful	•Relieved •Safe •Confident
Process Ownership <i>Who is in the lead on this?</i>	AI Weather Monitoring System	Machine Learning Prediction Engine	Emergency Response & Notification System
Opportunities <i>How can we improve this stage?</i>	•Improve weather data accuracy •Faster update frequency •Real-time rainfall monitoring	•Increase prediction accuracy •Personalized alerts •Interactive flood risk maps	•Faster emergency notifications •Shelter location guidance •Multilingual voice alerts
