

Date	4 July 2026
Team ID	xxxxxxx
Project Name	Rising-Waters-Flood-Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram

Provide a high-level visual representation of your solution architecture. Fill in the technologies and components in the boxes below.

Risk Analysis
Safety Recommendation Generator

↓ ↑

External API Integrations
Currently Not Used
(Future: Weather API / Rainfall API)

↓ ↑

Data / Storage Layer
SQLite Database
Prediction History
CSV Dataset
Pickle Model Files (.pkl)

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	User interface for entering flood parameters and displaying predictions	HTML, CSS, JavaScript, Bootstrap
API Gateway	Handles HTTP requests between client and server	Flask
Microservices	Executes prediction logic and processes user inputs	Python, XGBoost
Database	Stores prediction history and model-related data	SQLite, CSV Dataset
